Objective

I am dedicated and patient-focused with diverse experience in the medical field. Dedicated to providing the best patient care possible through listening to patients and employing motivational interviewing techniques.

Skills

- Excellent verbal and written communication skills that assist in educating the patient and providing the highest level of patient care.
- Background in functional medicine, providing a broader understanding of the interconnected complexity of diseases and the underlying causes.
- Problem-solving and analytical skills, which assist in determining a diagnosis even with the toughest cases.
- Strong interpersonal skills that help me work closely with other members of the care team for the best treatment plans.
- Skilled in motivational interviewing, including the ability to listen closely to patients, learn more about their complaints, and provide better treatment options for enhanced patient compliance.
- Effective at multi-tasking, and experienced in working in high-stress environments, including very busy medical clinics.
